

BIOPRESS CULTURE PLATES

Flexible bottomed culture plate for use with the Flexcell Compression Plus system.

- Each well contains a stationary platen which is compressed against a piston in the FX-4000C Compression Plus system to deform 3-D tissue samples or cell-seeded constructs.
- Ring foam holders keep samples confined to central region of each well.
- All plates come pre-sterilized.
- Available individually or in cases of 40 plates.
